- Syllent Pump with Heated Air*
- TCS - Thermal Comfort System
- Trim Kit Upgrade*
- Waste & Overflow Upgrades
 - Cable Drive Waste & Overflow*
 - PVC Waste & Overflow
 - Linear Waste & Overflow

(*) Standard on Platinum Series

INSTALLATION TIPS

1. Install according to Owner's Manual and local codes.
2. Always consult your local plumber for recommendations as installations will vary.
3. Any tub with a single system requires an access panel with minimum dimensions of 16" high x 20" wide.
4. Bathtubs with a combination of systems will require an access panel with minimum dimensions of 16" high by 28" wide. Tubs with multiple systems may require two separate access panels depending on the tub configuration and equipment.
5. The combination of multiple systems and options may require components to stick out and/or be remotely installed in the field. Check with factory before ordering.
6. Hot water supply should be 65%-75% of tub capacity or greater.

ELECTRICAL REQUIREMENTS

Americh recommends one 20 amp ground fault circuit interrupter (GFCI) for each power supply provided with the bathtub.
